

# Computer Aided Digital System Design

## Assignment N<sup>o</sup>0

Professor: Dr. Hajar Falahati

Author: Pooya Kabiri

Department of Computer Science

, Iran University of Science and Technology

September 2020

## 1 Personal Information

– **Full Name:** Pooya Kabiri

– **Student Number:** 96521434

– **E-mail:**

1. [pooya\\_kabiri@comp.iust.ac.ir](mailto:pooya_kabiri@comp.iust.ac.ir)

2. [pooya\\_kabiri@yahoo.com](mailto:pooya_kabiri@yahoo.com)

3. [pooya.kabiri@icloud.com](mailto:pooya.kabiri@icloud.com)

– **Preferred Mark:** 20

– **My plan after IUST:**

In my future life, I'll be trying to go down an academic path. I'm considering applying to study abroad in M.Sc. degree of Computer Science, Artificial Intelligence field.

I have a great enthusiast for research in different fields of Machine Learning and Deep Learning, I'm willing to enter an institute and/or company working on Computer Vision; Either in Iran or in a foreign country.

## 2 Thoughts regarding Computer Aided Digital System Design course

– **How many days do you prefer to accept late assignments?**

In my opinion, a total of 7 late days throughout the semester would be rational.

- **Do you prefer to work on assignments as a team?** Yes, Sure.

Team work always make it easier and applies less pressure specially for senior students.

- **How many students do you prefer to join an assignment team?**

I think for assignments, a total of 2 people per team is the ideal choice.

- **Do you prefer to divide the project during the semester?** No.

Considering the fact that students attending this course are usually senior or junior students, A significant number of them are now doing an Internship. In addition, During the semester every course—specially those for senior students—have a high assignment and project demand. CAD course also has assignments during the semester and I think it's for the best to put the project in the end of the semester.

- **How many students do you prefer to join a project team?**

I don't exactly know the outline of the final project, But in my experience a 3 to 4 person team is a good call. People can also test their team working skills on a such team.

- **More suggestions:**

As of now, recorded class sessions cannot be downloaded from LMS portal. Watching the videos inside the Adobe Connect requires internet connection; Also it doesn't provide any convenient functions for playback, Such as Fast-Forward, Skip or changing the playback speed rate. If you could ask the faculty to permit the download function we would be thankful. Also if the permission is denied, You can have your computer screen recorded by a 3rd party software and then share the recording with your students, Almost every other professor e.g. Dr Etemadi, Dr Mohammadi, Dr Hakami etc. now uses this method. I should also state the fact that CAD course is a course with high volume of materials, and we really need to review the classes regularly. At last, I would like to thank you for your effort on creating this introductory assignment and considering the ideas of your students.

Best Wishes.
